Professional Summary

Confident and **reliable developer** with strong skills in **software development**, **cloud**, **AI**, and **security**. Passionate about using **AI to solve real-world problems** and improve **decision-making**. Skilled at solving **tough problems** and working well in a **team**. Skilled in **Java**, **Python**,**C** and , with hands-on experience in **operating systems**, **data structures**, and **full-stack development**. Known for being **trustworthy**, **focused**, and always ready to take **ownership of tasks**.

Skills

- **Programming Languages:** Java, Python, C.
- **Software Development:** Software Design Principles, Testing Methodologies, Software Maintenance
- **Domains:** Artificial Intelligence, Machine Learning, Network Protocols, Data Structures & Algorithms (DSA), Operating Systems, Computer Architecture, Cloud Computing.
- **Databases & Cloud Platforms:** MySQL, MongoDB, AWS (EC2, S3)
- **Soft Skills:** Problem-Solving, Business Communication, Team Collaboration, Analytical Thinking, Adaptability

Experience

Technology Intern *Virtusa — Aug 2025 to June 2026*
Completed a 10-month Technology Internship at **Virtusa**, where I developed backend modules for a Grocery Inventory Management System using **Java, Spring Boot, MySQL, and RESTful APIs**. Implemented secure authentication using **Spring Security** and **JWT**, collaborated in an Agile environment, and used Git for version control. Additionally, contributed to a **Frontend Testing Proof of Concept (POC)** by developing a multi-step registration application using **React** and **Vite**, implementing form validation with **Zod**, integrating APIs, and performing component testing using **Vitest** and **React Testing Library** to improve application quality and reliability.

Full Stack Developer Intern *Smart Internz — June 2024 – July 2024*
Completed a remote Full Stack Developer internship at Smart Internz, where I built a secure food ordering platform using the **MERN stack**. Gained hands-on experience in **JWT authentication**, **RESTful APIs**, and responsive UI with React. Learned efficient schema design and backend integration using MongoDB, Node.js, Express, and Mongoose. Also explored **unit testing** with Jest and **end-to-end testing** using Selenium to ensure app reliability.

Project Highlights

- **Empowering Informed Food Choices with AI** *OpenCV, Pytesseract, Python, OCR, ngrok, Flask*
  Problem: Consumers often overlook harmful ingredients or allergens in packaged foods due to small print or lack of awareness, leading to health risks and uninformed dietary choices.
  Solution: Developed a Python-based web app that uses OCR (OpenCV + Pytesseract) to extract ingredients from food package images. Integrated an AI module to detect allergens and recommend healthier alternatives. Enabled remote, real-time access and sharing using Flask and ngrok.
- **Political Sentiment Analysis and Forecasting** *Python, NLP, VADER, TextBlob, Web Scraping*
  Problem: Inability to gauge public sentiment for regional political parties from multilingual social media data.
  Solution: Scraped Tamil tweets, translated them to English, and applied hybrid sentiment analysis using VADER and TextBlob. Optimized the pipeline with preprocessing, multithreading, and result caching.

Education

Integrated M.Tech in Computer Science and Engineering **2021 – Present**
Vellore Institute of Technology (VIT), Vellore CGPA: 7.47
Senior Secondary Examination (Class XII)(Out of 500) **2020 – 2021**
VVNKM Sr. Sec. School, Vellore 70.2%
Secondary Examination (Class X)(Out of 600) **2018 – 2019**
VVNKM Sr. Sec. School, Vellore 60.33%
