Education

Vellore Institute of Technology Vellore, India
Integrated M.Tech in Computer Science and Engineering *2021 – 2026*

Experience

AhaApps Infotech Pvt Ltd Hyderabad, India (Onsite)
Software Development Intern *Oct 2025 – Jul 2026*

- Full-stack contributor to **LTV360**, a secure 360° employee feedback platform built for the Miami Dolphins organization – developed survey, reporting, and admin UIs in **React 18** and REST APIs in **ASP.NET Core (.NET 10)**.
- Implemented a weighted scoring engine (standard 40/40/20 split, exception 50/50 fallback) with proportional weight redistribution, and a deterministic anonymization service that masks evaluator identities while preserving self-evaluation context.
- Built an asynchronous email-queue worker (.NET `IHostedService`) with retry logic and HTML templating, and a headless-Chromium PDF report generator (PuppeteerSharp) using a reusable singleton browser instance.
- Improved reporting performance with targeted SQL Server composite indexes and a single-pass score-aggregation algorithm; automated multi-environment CI/CD on Azure DevOps with branch-level config validation.
- Automated insurance document (COI) validation workflows using Microsoft Power Automate and AI Builder with .NET-based rule validation, cutting processing time from 30 minutes to 2 minutes per document.

Virtusa Remote
Software Development Intern – Backend *Aug 2025 – Jun 2026*

- Developed backend services for a logistics management system using **Spring Boot** and REST APIs.
- Implemented role-based authentication and inventory/delivery management workflows.
- Designed relational schemas and queries in **MySQL** to support inventory tracking and reporting.

Projects

- **Natural Language to SQL using Offline LLMs**
  Built a backend service allowing users to query relational databases using plain English. Implemented schema-aware prompting and query validation before execution.
  Tech: Python, LangChain, Local LLMs, SQL

- **Backend Inventory & Delivery Management System**
  Developed a backend-driven inventory and delivery tracking system with role-based access for internal teams and delivery agents. Designed REST APIs for inventory updates, delivery status tracking, and reporting workflows.
  Tech: Spring Boot, REST APIs, MySQL, Spring Security

Technical Skills

Backend: .NET / ASP.NET Core, Spring Boot, REST API design, asynchronous processing

Programming: Python, Java, C#, SQL

Frontend: React.js, HTML, CSS

Databases: MySQL, SQL Server, MongoDB

Automation: Microsoft Power Platform, AI Builder

LLMs & NLP: LangChain, Prompt Engineering, Offline LLMs

Cloud: AWS (EC2, S3), Azure (App Services, DevOps Pipelines)

DevOps: Docker, GitHub Actions, Jenkins, Kubernetes

Tools: Git, GitHub

Certifications

Microsoft Certified: Azure AI Fundamentals (AI-900)
