GURRAM BHAVANI REDDY

Hyderabad, India | bhavanireddy1211@gmail.com | 9010802968 | LinkedIn | GitHub

SUMMARY

Computer Science (Integrated M.Tech) graduate with hands-on experience in backend development, REST API testing, data analytics, and network monitoring. Skilled in Java, Python, SQL, Spring Boot, Power BI, Postman, MySQL, MongoDB, Git, and Azure (AI-900 certified). Adaptable across software development,data analysis.

TECHNICAL SKILLS

Languages: Java, Python, SQL,HTML, CSS

Backend & Testing: Spring Boot, REST APIs, Postman,Nmap

Data & BI: MySQL, MongoDB, Power BI (DAX), Power Query, Excel,

ML & Cloud: Scikit-Learn, Pandas, NumPy, Azure (AI-900),Git, Grafana, InfluxDB

EXPERIENCE

Project Intern – eSociety Financial Management System *Virtusa | Aug 2025 – Jun 2026*

- Developed an eSociety Financial Management System using Flutter, Spring Boot, and MongoDB to manage society finances, including expense tracking, dues management, dashboards, and financial reporting.
- Developed backend REST APIs for the Reports module using Spring Boot, implementing expense reports, expense summaries, yearly financial reports, and year-over-year (YoY) analytics.
- Implemented service-layer business logic for filtering reports by status and date range, calculating financial summaries, and mapping entities to DTOs for efficient API responses using Spring Data MongoDB.
- Tested REST APIs using Postman, validated API responses across multiple reporting scenarios, and collaborated with the frontend team to integrate the Reports module successfully.

IT Intern – Network Monitoring & Security *DRDO | May 2024 – Jun 2024*

- Developed a network security monitoring system using Nmap to scan and identify open ports on critical infrastructure.
- Integrated InfluxDB for efficient data storage and leveraged Grafana for real-time visualization and analysis.
- Enhanced network security insights, reducing manual monitoring efforts and aiding proactive threat management.

PROJECTS

Sales Insights Dashboard *SQL, Power BI ,Excel*

- Extracted and modeled MySQL data into a star-schema Power BI report with DAX measures to track revenue, customer segmentation, and regional KPIs.

Disease Prediction Analysis *Python, Pandas, Scikit-learn*

- Built an end-to-end ML pipeline on a 40+ disease-class healthcare dataset; trained a multi-class model achieving 97% accuracy, evaluated via precision, recall, and F1-score.

EDUCATION

Vellore Institute of Technology Vellore
Integrated M.Tech in Computer Science — CGPA: 8.61/10 2021 – 2026 (Expected)

Deeksha Junior College Hyderabad
Intermediate (MPC) — 96% 2019 – 2021

CERTIFICATIONS & EXTRACURRICULAR

- AI-900: Microsoft Azure AI Fundamentals | HackerRank: Java (Medium) | Introduction to SQL – Simplilearn
- Core Member, Rotaract Club | Trained Kuchipudi Dancer
