PROFESSIONAL SUMMARY

Integrated M.Tech Computer Science and Engineering student at VIT Vellore with 10 months of industry experience in full-stack software development. Skilled in building scalable web applications, RESTful APIs, and database-driven systems using Java, Spring Boot, React, and MongoDB. Strong foundation in problem-solving and software engineering principles.

EDUCATION

Vellore Institute of Technology (VIT), Vellore 2021 – 2026
Integrated M.Tech in Computer Science and Engineering CGPA: 8.00/10

TECHNICAL SKILLS

Languages: Java , JavaScript, SQL
Frontend: HTML5, CSS3
Backend: Spring Boot, RESTful APIs
Databases: MySQL, MongoDB
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

WORK EXPERIENCE

Virtusa | Intern *August 2025–June 2026*
Tech Stack: Vue.js, Spring Boot, RESTful API, MongoDB

- Architected a responsive enterprise application for traffic police to manage violations and coordinate emergency responses in real time, reducing manual processing effort by **40%**.
- Engineered scalable RESTful APIs powering multiple business-critical dashboards, integrating geolocation tracking, SOS alerts, and digital payment services.
- Implemented secure JWT-based authentication and optimized SQL queries, improving data retrieval efficiency and ensuring reliability under concurrent workloads.
- Collaborated within Agile development teams, contributing to debugging, testing, code reviews, and feature delivery.

PROJECTS

CNS — Service Booking & Management Portal *React · Node.js · Express.js · MySQL · REST API*

- Built a full-stack service management platform enabling appointment scheduling, request tracking, and centralized administration.
- Designed and developed RESTful APIs and backend functionalities using Node.js and Express.js. Worked with MySQL databases to implement data management, query optimization, and seamless integration with web applications.
- Optimized MySQL aggregation queries for analytics dashboards, improving response performance by **65%**.

YouTube Notes Maker and Video Analyser *Python · Google Gemini API · NLP · Streamlit*

- Designed and implemented end-to-end NLP pipelines incorporating transcript processing, TF - IDF - based keyword extraction, sentiment analysis, and content classification to identify critical topics and trends.
- Achieved over **90%** key-topic identification accuracy across 500+ test videos while improving information accessibility and user productivity.
- Reduced manual content review effort by **85%** through automated summarization and reporting workflows.
